

Médecins Sans Frontières Switzerland (MSF) is recruiting

Paediatricians

for our projects in Yemen

(Recurrent needs for other projects: South Sudan, DRC, Niger, Tanzania, Iraq, Lebanon)

Start date: flexible

Duration: 3 – 6 months

As a paediatric doctor you may be required to respond to cholera or other epidemics, manage hospital-based care for severely ill neonates, address the needs of ill, injured or malnourished children, or work with displaced families or refugees. Being an MSF paediatrician is a challenging and exciting role, and the needs are very diverse.

Your Responsibilities

- Apply medical knowledge and skills to the prevention, diagnosis and treatment of children; ensure integrated newborn and paediatric care through emergency, outpatient and inpatient department services and treat cases of malnutrition in line with protocols and universal precautions
- Propose modifications to current paediatric care management and implement them once approved by the paediatric advisor
- Ensure quality of care by giving ongoing newborn and paediatric training to the multidisciplinary medical/paramedical team, reviewing complicated cases and giving technical input
- Keep patients and families informed of the illness and treatment to be followed, and check that they have understood; ensure that professional autonomy and confidentiality are respected, and demonstrate a good attitude and bedside manner towards patients and their caregivers
- Monitor the evolution of the hospital patients through daily visits, consultations and examinations
- Monitor the proper functioning of the department and its patient flow; provide inputs and general organisation of the different paediatric wards, including admission, transfer and discharge criteria and the procedure for referrals from the maternity and post-delivery wards
- Teaching and coaching the national team

Depending on our activities and needs, your responsibilities may be adapted and evolve according to the specificities of each project. You will not be facing these challenges alone—other MSF team members, both international and locally hired staff, will provide technical support, including extensive guidelines and protocols.

Your Profile

- Medical doctor degree
- Paediatrics specialisation
- Recent clinical experience (at least six months within the last 24 months)
- Fluency in English or in French
- Available for 3 to 6 months
- Commitment to MSF's social mission and values
- Strong team player

Assets

- MSF experience and/or working experience in developing countries or humanitarian settings
- Experience in neonatology and/or in emergency paediatric room
- Teaching/coaching experience and interest
- Recent PALS/APLS or equivalent paediatric/neonatal advance resuscitation certification or training
- Arabic knowledge

MSF offers

As an expatriate leaving to the field, you will receive:

- An exciting work experience as your skills will make a difference to the people around you
- Initial training before your first mission
- Detailed briefing on identified project
- Psychosocial assistance before, during or after mission
- Remuneration (indemnity salary based on previous work experience and country of residency)
- Welfare coverage, such as medical care and vaccination package, accident insurance, including repatriation
- Food and accommodation
- Per diem (calculated according to local cost of living) to cover daily expenses
- Travel costs and visa administration
- Debriefing and personal career planning as well as training opportunities
- Contract for the duration of the mission
- One week of holiday for every three months of mission (in the country for Yemen mission)
- Departure on mission is non-accompanied (no family or couple departures).

For more information on our recruitment criteria or working conditions, please read: <https://www.msf.ch/en/work-with-us>

We will run an information webinar for interested candidates on 4th November at 3 pm CET.

You can register for the upcoming event [here](#). Should you not make it for this one, more webinars are offered on our [website](#).

About MSF

Working with MSF is helping people in danger in the field. Your skills are needed in the context of primary health care (natural catastrophes, population displacements), chronic conflicts or within the scope of particular medical projects.

By joining MSF, you are committing yourself to a recognized international associative movement, with a specific approach to humanitarian help. You advocate for the situations you have seen on the field. You benefit from a personalized career follow-up, you develop competencies and on the long term gain responsibilities.

MSF is a civil society initiative that brings together individuals committed to the assistance of other human beings in crisis. As such MSF is by choice an association.

Each individual working with MSF does it out of conviction and is ready to uphold the values and principles of MSF. For more information on the MSF Charta, please read [here](#).

How to apply

Interested candidates should forward their complete application (resume and letter of motivation) to recruitment@geneva.msf.org, stating “**Paediatrician_Nov2020**” in the subject line.

The deadline for applications is 20th November 2020.

The applications will be treated confidentially.

Only short-listed candidates will be contacted.
